The non-arrival of the most stenmer from San Francisco has given rise to speculations as to the causes of the irregularity and its effect on the future of the line. That there has been some gross minimum-general of its Emances is very clear. No one appected that the line would be self supporting until after the new books, now being built, commerced running. Amplmeans should therefore have been provided to carry forward the enterprise till that time. The latest advices which we the office of the clerk of the Supreme Court to-day, have regarding the Tartar are that it was boyed that some arresponsed would be completed in time to allow of her de parture for Homolelu and Australia by July 25. And in the event of her withdrawall another steamer might be churtered permitty the passengers and units waiting for Australia. The interruption of communication, even for a month only armst operate injuriously to the interests of the line, which has stoodily galating in the amount of its freight and passenger

> TEMPERANCE LECTURE.-Mr. J. E. Chamberlain delivered an interesting lecture on Friday evening, at the Vestry Room of the Fort Street Church. The attendance was not large. The subject of the lecture was intemperance in Honolulu and the Hawaiian Islands, and the speaker brought out many facts of general interest, interspersed with anecdotes. He drew a vivid pleture of the condition of the prople before the establishment of a regular government in 1840, showing what ardent spirits did towards decimating the population. He presented data to show that from the year 1850 to 1873, there have been consumed here spirits to the amount of 84,214,734.
